Passengers: 2,707
Completed flights: 96%

■ On-time: 233 ■ Delayed: 65 ■ Canceled: 13

Improved Areas of Service

- Over the last three months, Contour has experienced a significant drop in cancelations
- Continued improvement month to month in flights that are on time
- Their maintenance team has done an excellent job quickly addressing issues as they arise, as is shown by the decrease in cancellations from the past two quarters.

Areas for Additional Improvement

- Provide more information to passengers on reasons for delays and cancellations
- Reduce incidents of multiple flight cancellations by utilizing spare airplanes
- Work on better assisting passengers to their destinations when flights are canceled
- Decrease frequency of preventable delays by purchasing fuel in Kirksville rather than in Chicago where there are long wait times for fueling

Communication with Contour

- Weekly meeting with Kirksville's station manager
- Bi-weekly phone conference with Contour's regional station manager
- Quarterly phone conference with Contour Airlines President Matt Chaifetz
